

BRITCON 2018

WARHAMMER 40K FAQ dated 21st May 2018

- Will we be using the latest BETA rules as per issues by Games Workshop?

Ans: Yes we will be including the BETA rules. (Currently the rules issues in April 2018 will be used) These include the Max number of the same units restricted by the point limit and the restrictions to reserves arriving in turn 1.

- Can I use a different codex force for the different army lists e.g Tau for the 750 list and Space Marines for the other two lists?

Ans: There is nothing in the rules pack to say that you cannot do just that or any other variant. Though it does kind of go against the idea of the Theme of the weekend. So as a measure to not prevent people playing those toys they want to bring, but encourage the sticking to the theme. We are offering a 10pt tournament score bonus if you use the same single core codex (race) throughout all of your lists.

- What if I use Tau for the 750, 1400 and the battalion of the 1800 list, but add another detachment in the 1800 list (as per the rule pack) which is of another race?

Ans. There is no penalty for this and you would qualify for a 5pt bonus provided the Tau force in the 1800pt list made up over half the points spent. SO to break it down, if you use one codex/chapter through out all lists, you get 10 bonus points. if you add in another Chapter/race/codex as an ally in the 1800 pt list, you get 5pts. If you change codex/races in a complete list -no bonus points. If not sure then ask.

- How will you play the rules for units that react to units deep striking, and deploy within 9" of the units arrival its reacting too. E.g. Necron Death Marks?

Ans. This is an issue that has yet to be addressed by Games Workshop but may be prior to the Tournament. However until then we will house rule that the unit that reacts can be deployed anywhere on the table as long as it is at least 9" from any enemy model. This may mean they are considerably more than 9" from its intended target.

- There are several occurrences where an item (relic) in the index has been removed and placed as a stratagem in the codex. Can I still take the relic from the index and also use the stratagem from the codex?

Ans. No if the item has been replace with a stratagem with the same name or same power, then you cannot take the old relic from the index.

- The new command points for the various detachments has been increased in the BETA rules, will we also use these new values?

Ans. Yes we will be using these and it will be taken into account when you get the starting value for your tournament command points. Remember you will be given a set total at the start of the tournament and you can use as many as you want each game until you run out then no more. This is to represent the limited resources your force has, that are put into pulling off these stratagems.
