DIAGRAMS

In a few instances diagrams are not as accurate as they should be in explaining the rules. The specific diagrams that are inaccurate are:

Page 62: Diagram "FINAL POSITION AFTER STEPPING FORWARDS" 2 of the text boxes refer to "2 dice vs 2 dice" both of which should read "3 dice vs 3 dice"

Pages 63, 64 & 65: Some of these diagrams are showing an incorrect measurement when a wheel is involved in a move. When a wheel is including as part of any move, measure the distance moved while wheeling separately from any distance moved in a straight line and add together for total distance moved.

Page 81: Top diagram: Should clearly show that the right hand firing unit actually has 2 files with the target at least partially to their front to get 4 firing dice. (3 front rank dice and 1 rear rank dice).

If only one file had the target to its front the number of firing dice would be 3 (2 front rank and one rear rank).
